Employment History

Caltat Moscow

AdTech platform with Big Data and AI tools for personalized advertising: customer data platform, user tracking and lead generation

Graphic → Web Designer Dec 2024 — Sep 2025

- Started in communication design: created promotional materials and visual assets for Caltat products
- Transitioned into web design, taking over landing pages from structure and wireframes to final UI
- Built landing page layouts in Figma with auto-layout, components and variables to speed up iterations
- Prepared clickable prototypes with basic animation to present concepts to stakeholders
- Designed web banners for advertising campaigns
- Created icon packs in a consistent visual style for the platform

Education

Moscow Financial University

Bachelor's in PR & Advertising Sep 2019 — May 2023

- Studied sociology, marketing and consumer psychology — the foundation of my UX research practice
- Explored how brands communicate with audiences and what drives people's decisions and motivations
- Learned to conduct qualitative and quantitative research: interviews, focus groups and surveys
- Built empathy maps and user personas to turn research findings into audience insights
- Practiced the STAR methodology for structuring research and project stories
- Graphic design coursework: color theory, typography, grid systems and composition

Extra Education

T-shaped Designer Wannabe

Autumn 2025

- Systematized my Figma workflow with variables, components and advanced prototyping
- Designed a landing page case from wireframe to dev-ready layouts, plus banners
- Leveled up in Cinema 4D: 3D key visual and icon set rendered in Redshift

AI Upgrade Wannabe

Summer 2026

- Built an end-to-end AI production pipeline with Midjourney, Krea, Magnific, Higgsfield and Weave
- Created a brand key visual with a mascot and rolled it out into banner adaptations
- Designed a promo landing concept and packaged the work into a pitch deck

Superpowered UX/UI Wannabe

Summer 2026

- Shifted from visual-first to product thinking: framing problems with JTBD, CJM and metrics before designing
- Designed an app case from research and wireframes to a design system and clickable prototype
- Validated solutions with UX testing and prepared layouts for dev handoff
